SUMMARY

Front-End Developer with **1.5 years of experience** building **reusable, accessible, and high-performance interfaces** using **React, Next.js, and TypeScript**. Strong focus on **clean architecture, maintainable code, and modern UI best practices**. Passionate about delivering **exceptional user experiences** and contributing to a **collaborative, remote-first team** environment.

SKILLS

- **Frontend Technologies:** React.js, Next.js, TypeScript, Redux, React Query (TanStack Query), Shadcn UI, Tailwind CSS, Jest (Unit Testing)
- **Back-End Technologies:** Node.js, Express.js, MongoDB
- **Tools & Platforms:** Git, GitHub, Docker, Vercel, Figma, Chrome DevTools
- **Core Concepts:** Data Structures & Algorithms, Performance Optimization, Responsive Design, Mobile-First Development, RESTful APIs, Accessibility, Communication, Teamwork, Agile Methodologies

PROFESSIONAL EXPERIENCE

Front-End Developer (Freelance) | Remote

- Built **reusable React + TypeScript components**, reducing front-end development time by **30%** through code reuse and modular design.
- Designed **client-facing web applications** with React, Redux, TypeScript, and Tailwind CSS, **improving initial page load by 40%** using code splitting, image optimization, and efficient state management.
- Optimized **front-end architecture** with caching and lazy loading, **cutting load times by 35%** and boosting **Core Web Vitals and user experience** across multiple projects.

PROJECT EXPERIENCE

Shoee – E-commerce Platform

Stack: **React.js, React Query, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS**

- Developed a dynamic product catalog and interactive shopping cart with Redux Toolkit.
- Improved **code reusability by 40%** by modularizing shared components, accelerating feature implementation timelines across the platform.
- Achieved Lighthouse scores: **96% Performance, 88% Accessibility, 100% Best Practices** on Lighthouse by optimizing assets, accessibility tags, and coding standards.

Finvestor – Personal Finance Tracker

Tech Stack: **Next.js, React Query (TanStack Query), TypeScript, MongoDB, Shadcn UI, Tailwind CSS**

- Developed a full-stack web application for managing **income, expenses, debts, and savings goals**, giving users clear, actionable insights into their financial health.

- Designed and implemented an expense goal system with **dynamic progress tracking** to help users budget and save effectively.
- Architected front-end using **Next.js caching** and **TanStack Query for client-side** data management, **reducing page load times by 35%.**
- Optimized UX, performance, and accessibility, achieving **95% Performance, 90% Accessibility, and 98% Best Practices** on Lighthouse through SSR, semantic HTML, and utility-first Tailwind styling.

Custom React Video Player

Stack: **React, TypeScript, Tailwind CSS, HTML5 Video API**

- Built a fully custom, accessible, and responsive video player from scratch, incorporating features like theater mode, custom controls, and keyboard shortcuts.
- Crafted reusable React hooks and a clean component architecture for easy integration.

EDUCATION

Damanhour University | Bachelor's Degree in Business Management

- Gained a strong foundation in project planning, iterative development, and MVP-driven strategies that directly support software development workflows.

Developed a user-centered mindset that enhances UI/UX thinking and cross-functional collaboration.

Microverse (Remote) | Front-End Web Development Program

- Completed 650+ hours of hands-on training in front-end development, specializing in JavaScript, React, and Redux.
- Gained experience in remote pair programming, Git/GitHub workflows, and Agile methodologies.
